(54) Title: METHOD AND ENCODER FOR ENCODING A DIGITAL VIDEO SIGNAL

(57) Abstract: The present invention relates to a method and an encoder for processing a digital video signal, said digital video signal comprising at least a scene cut (CUT) followed by a set of images. It is characterized in that it comprises the steps of: - Localizing said scene cut (CUT), - Defining a sub set of visually non-relevant images (IS) within said set of images, and - Issuing a set of encoded visually non-relevant images (IS') just after the scene cut (CUT) by calculating said set from a visually relevant image (I(t+2)) after said scene cut (CUT).
